

HANDISOL II®

PORTABLE LOCALIZED PHOTOTHERAPY TREATMENT

OVERVIEW

The Handisol II® is a mid-size phototherapy device that is designed to be lightweight and portable. The device features high-efficiency reflectors to maximize side light dispersion for broad and uniform light coverage for the treatment of psoriasis, vitiligo, and other photoresponsive conditions - all from the comfort and convenience of your own home.

KEY FEATURES

- Slim, lightweight, and portable, making storage and set up easy
- Adjustable – can be used horizontally, vertically or at an angle
- High-efficiency reflectors maximize light dispersion for broad, uniform coverage
- Acrylic shield provides a surface for consistent treatment distance to place hands, feet, forearms, or other affected areas requiring treatment
- Safety on/off key prevents accidental or unauthorized use
- Safety control panel with built in timer ensures the accurate UVB dosage is administered each and every time
- Partially or fully covered by many insurance plans
